

## July, 2015 Nebraska MUFON

We had a full house for this month's meeting.

First, Jack gave a short presentation based on an article he tried to publish in the World Herald but they would not print it. Global Warming Is Not What you Think. He presented peer-reviewed scientific evidence summarizing what we know about the subject and what factors are causing some false assumptions. This was followed by a short Q&A session culminating in a warm round of applause for his 25 years of service to MUFON.

Next, Dave reviewed the new format for monthly meetings as seen here:

- 1.) Monthly MUFON Statistics
- 2.) Case Highlights from around the world
- 3.) Case summaries for NE/ In progress
- 4.) MUFON National and State news
- 5.) Science Center (How to use the fractal analysis tools)
- 6.) Open discussion

Second half of meeting

1. Sky Report Rich
2. Field Investigator Training Keene Part 1

3. Field Investigator Case Review
4. Project committee Topic Research and Investigation

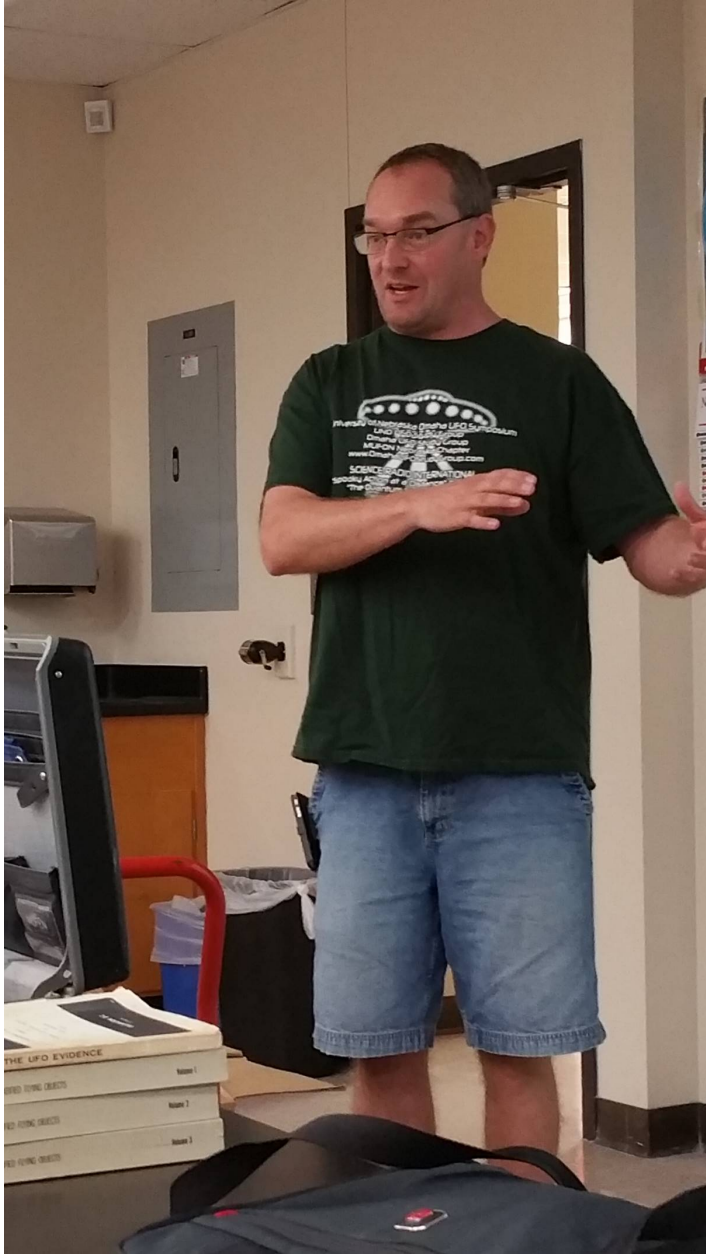

We learned the Panera stores have community bulletin boards where we can publish our monthly meetings.

We discussed the need to consolidate and update our websites and Dave and Jack also had an offline conversation about that during the break.

Rich has volunteered to help us with image analysis and his wife, Renee, will be our treasurer.

Greg mentioned Chimp Mail as a way to disseminate MUFON data within our group and Keene will give that a look and report back if it looks worthy of the effort to change over.

The second hour was devoted to Steve's presentation of the Herb Schirmer case and the new library additions that were donated to our group.

Keene F. Tiedemann, DM  
Mutual UFO Network  
Nebraska Assistant State Director
